

Polystyrene (PVC) venetian blinds are fully adjustable to provide the desired light ambience. They have exceptional thermal stability and suitability for high-moisture environments. These wood look-alike blinds are a reliable, highly functional, and decorative window treatment.

- Exceptional thermal stability and resilience for harsh New Zealand conditions
- Great for wet or high-moisture areas like bathrooms and kitchens

Set light and temperature for optimum comfort

By tilting of the slats, you can create the exact light ambience you want. In winter, heat is conserved when slats are closed. In summer, they can be opened to let the cool breeze through.

Clear unrestricted view - or total blackout for privacy

Setting these blinds to full-tilt blocks the light and creates total privacy at night. Pulling them right up gives an unrestricted view.

Long-lasting and resilient

PVC blinds have high stability in

extreme temperature environments

- however very dark colours are not recommended in very sunny locations. They are rated at 60°C, so temperatures above this may cause permanent damage to the product.

They are great for high moisture areas such as kitchens, bathrooms, and confined or poorly-ventilated areas.

Easy to operate

Our blinds are smooth and easy to draw up and down. There is one cord to open and close slats, plus cords to raise and lower the blind – with steel self-locking to hold their position. Cords can be optionally on the left or right.

Specifications

Size

- Minimum width:
 - Tilt only: 264mm
 - Split controls: 300mm
 - Combined control: 400mm
- Maximum width: 2,400mm
- Drop limits: 200mm – 3,000mm
- Maximum area: 5.6m² (3m² if frequent raising and lowering)

Components

- Slat width: 50mm
- Slat thickness: 3.4mm
- Valance (fascia): 82.5 x 8.3mm 'Harbour Bridge' design
- Head rail: standard high profile 57 x 51mm
- Bottom rail: standard 50.2 x 14.5mm high-profile
- Cords optionally on left or right as required
- Installation items included: brackets, screws

Installation

- Easy to lift and angle, installed in minutes with easy-to-follow instructions

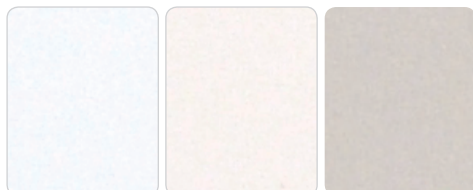

Operation

- Separate cords for pull-up and tilting of slats, optionally on left or right side
- Slats tiltable to 180 degrees - from clear unrestricted view through to total blackout
- Easy quiet lifting with finer cord and brass locking roller (vs pin)
- Temperature rating: max 60°C

Cleaning

- Remove dust from blinds with vacuum cleaner or compressed air
- Clean with damp cloth
- Do not scrub, use solvents or any abrasive substance, to avoid damaging slat coating

Colour range

White

Alabaster

Ghost Gum

Blinds have complete matching of valances, headbox, bottom rails, tassels, tapes, and cords for a perfectly integrated presentation.
